

Dr. Hemant L. Patel

Strategy, Government Engagement & Digital Public Health Transformation Leader
18+ Years | WHO • CARE India • Govt of Gujarat • WISH Foundation • Health-Tech

✉ hemantdoc@gmail.com ☎ +91-7600596053 📍 India-based | Available for New Delhi / hybrid leadership role

PROFESSIONAL SUMMARY

Public health strategy and transformation leader with 18+ years driving government engagement, evidence-based program scale-up, and digital public health innovation across WHO, CARE India, Government of Gujarat, WISH Foundation, and health-tech entrepreneurship. Deep experience in senior stakeholder coordination with MoHFW/NHM-linked platforms, State Health Societies, district and municipal administrations, WHO, UNICEF, and development partners. Recognized for enabling Bihar's 33+ lakh single-day COVID-19 Maha-Abhiyan, Gujarat's award-winning Chitta/Cheetah Bike Express last-mile model, and WHO-supported surveillance strengthening that identified 30+ measles outbreaks from a zero-detection baseline. Skilled in chief-of-staff-style executive support, data-driven decision systems, digital and emerging AI-enabled workflows, and translating strategy into sustainable, government-owned implementation at population scale.

CORE COMPETENCIES

Government Engagement & Senior Stakeholder Coordination	Strategy, Scale-up & Organisational Transformation
Executive Coordination & Chief-of-Staff Support	Evidence-Based Public Health Delivery & M&E
Digital Health, Data Systems & AI-Enabled Workflows	Last-Mile Delivery Innovation & Equity-Focused Models
Communications, Knowledge Products & Donor Engagement	Cross-Sector Partnership (Health, WCD, Education, Panchayati Raj)

SELECTED IMPACT & RECOGNITION

Bihar COVID-19 Maha-Abhiyan: Enabled 33+ lakh vaccinations in a single day — highest in India; felicitated by Health Minister, Bihar.	Gujarat Last-Mile Models: Designed Chitta/Cheetah Bike Express & Sanjeevani Express; adopted by Govt of Gujarat, replicated across districts (SKOCH Gold Award; IIM Raipur case study).
Vaccine Equity Analytics: Built dashboards that reduced district-level coverage variation from $\pm 20\%$ to $\sim 5\%$, enabling more equitable access during national rollout.	WHO Surveillance Strengthening: Identified 30+ measles outbreaks (20+ lab-confirmed) in Sitamarhi from zero prior detection baseline; transitioned to case-based surveillance for elimination goals.
CARE India Multi-State Expansion: Provided backend support to 11 states + leadership for Bihar, Jharkhand, Manipur & Gujarat; converted concepts into government-supported implementation pathways.	AI-Enabled Training at Scale: Coordinated production of 100+ minutes of frontline health worker training content under World Bank-funded Gujarat project.
International Recognition: Speaker at Biologistics World Asia 2021 on COVID-19 vaccine rollout, cold chain & immunization supply chains.	

PROFESSIONAL EXPERIENCE

Associate Director – Programs

Jul 2024 – Jan 2025

LEHS / WISH Foundation, India

- Led program strategy, donor engagement, digital health initiatives, and review processes across public health and digital health portfolios; guided ABDM-aligned tool development for scalable implementation.
- Coordinated donor-facing processes, proposal inputs, and program design discussions; supported wireframing, database design, rollout planning, and user-centered improvements.

Founder & CEO

Sep 2022 – Jul 2024

Sankhyank Tech Solutions LLP, Gandhinagar, Gujarat

- Founded health-tech venture delivering digital public health tools, analytics platforms, AI-enabled workflows, and data transformation solutions for government and NGO decision-making.
- Bridged public health domain expertise with technology design — translating program problems into scalable, user-friendly digital products and evidence-review systems.

State RI & VHSND Specialist / Head – Immunization Division

Feb 2020 – Aug 2022

CARE India, Bihar / Multi-State Support

- Served on Bihar State CORE Team for COVID-19 surveillance & vaccination; represented CARE India in national/state coordination forums with MoHFW/NHM, Immunization Division, WHO, UNICEF, and State Health Society Bihar.
- Provided chief-of-staff-style support to senior leadership (ED SHS Bihar, Additional ED, program officers) — managing daily/weekly reviews, operational briefs, dashboards, action tracking, partner alignment, and escalation across governance rhythms.
- Prepared senior leadership briefing inputs, review notes, dashboards, and follow-up trackers for high-stakes government and partner engagements across daily, weekly, and monthly governance rhythms.
- Designed and operationalized Chitta/Cheetah Bike Express and Sanjeevani Express last-mile models for hard-to-reach populations; supported government adoption and district-level replication as a broader health service delivery approach.
- Developed vaccine distribution analytics and digital reporting systems (dashboards, chatbot workflows, EHR-linked tools) that reduced coverage variation from $\pm 20\%$ to $\sim 5\%$ and shifted fragmented reporting into standardized, cloud-based platforms.
- Enabled program expansion into Jharkhand, Manipur & Gujarat through senior stakeholder relationships and conversion of vaccination/nutrition concepts into government-supported pathways.
- Led Teekanama, a monthly immunization knowledge and positioning product, curating state progress, best practices, implementation learning, and government/partner communication for senior stakeholders; also contributed to Meta/Facebook-linked COVID-19 vaccination chatbot workflow design.

Surveillance Medical Officer

Dec 2017 – Feb 2020

World Health Organization, Sitamarhi, Bihar (Aspirational District)

- Prepared Health Action Plan for Sitamarhi Aspirational District presented to Government of India; led extended Gram Swaraj Abhiyan achieving one of the highest child immunization numbers in state/nation.
- Strengthened surveillance systems identifying 30+ measles outbreaks (20+ lab-confirmed) from zero baseline; transitioned from outbreak-based to case-based surveillance supporting Measles Elimination goals.
- Supported introduction of new vaccines (PCV, Rotavirus, JE, MR) and major campaigns (Intensified Mission Indradhanush, Gram Swaraj Abhiyan, MR Campaign) despite elections, exams, and HR constraints.

Municipal Health Officer

Oct 2011 – Nov 2017

Government of Gujarat, Kalol, Gandhinagar

- Led urban public health governance, epidemic control, sanitation, family planning, and National Urban Health Mission implementation for Kalol city; achieved ODF certification and 34th national / 4th Gujarat ranking under Swachh Bharat Mission.
- Designed epidemic-prevention systems using local disease trends; led high-performing family planning initiatives (NSV/IUCD camps) recognized by district administration; supported introduction of new vaccines (Pentavalent, MR-2, IPV).

Earlier Roles: Junior Resident (Govt of Gujarat) | Research Coordinator (BA Research)

2008 – 2011

CROSS-CUTTING EXPERTISE: DIGITAL HEALTH, AI & DONOR ENGAGEMENT

Digital & AI: Designed dashboards, automated reporting, review templates, chatbot workflows (Meta/Facebook-linked), EHR-linked & cloud-based systems for public health monitoring; supported ABDM-aligned tools at WISH; coordinated AI-enabled production of 100+ min frontline training content (World Bank-Gujarat).

Donor & Communications: Contributed implementation insights, operational feasibility, and budget assumptions to donor discussions and proposal development at CARE India and WISH; prepared government review materials, progress briefs, and operational demands for state/national platforms; led recurring knowledge products for government, partners, and donors.
